VSCode

Github

Netlify

Postman

Adobe

SUMMARY

Full stack software engineer with a background in customer service and prior knowledge in graphic design and other digital arts. Passionate to learn more about software and the tech world around me. I enjoy creating apps that let me problem-solve and use my creativity.

PROJECTS

GAMESTACK

JavaScript | CSS | HTML5 | Netlify | Supabase

GameStack is a virtual library of board games where users can find and add games to there profile in Realtime. I worked heavily with CSS to improve user-experience and in JavaScript to create randomize logic for User and Public libraries.

TERMINAL ESCAPE

JavaScript | SQL | Express | Heroku

Terminal Escape is a sprint project where players navigate through a forest using the terminal. The team and I built an API and use Express JS to call routes from a backend hosted with Heroku and created a User friendly experience in the terminal.

EXPERIENCE

TACO BELL

June 2021 - January 2023

- Communication abilities with customers and team
